The image shows a storyboard diagram for a 'Search' screen. The screen has a light gray background and a dark gray border. At the top center, the title 'Search' is displayed. Below the title, there are two radio buttons on the left: 'Search by Date' (unselected) and 'Search by Tags' (selected). To the right of these radio buttons are two text input fields. The first input field is labeled 'Enter First Tag-Value pair' and the second is labeled 'Enter Second Tag-Value pair'. Between these two input fields are two radio buttons: 'AND' (unselected) and 'OR' (unselected). Below the input fields is a button labeled 'Search for Tags'. Two blue arrows originate from the radio buttons on the left. One arrow points from the 'Search by Date' radio button to a box labeled '3'. The other arrow points from the 'Search by Tags' radio button to a box labeled '6'.

The storyboard diagram shows a mobile application interface for managing albums. The main screen is titled "Album Name" and contains several elements:

- Back to Albums List**: A button in the top left corner.
- Logbut**: A button in the top right corner.
- Search**: A modal window with options to "Search by Date" or "Search by Tags". It includes input fields for "Enter First Tag Value" and "Enter Second Tag Value", logical operators "AND" and "OR", and a "Search for Tags" button.
- Caption:** A label with the value "photo caption".
- Date Taken:** A label with the value "data photo taken".
- Tags:** A label above a rectangular input field.
- Move to Other Album**: A button.
- Enter Other Album Name**: An input field.
- Move Photo**: A button.
- Cancel**: A button.
- Error: Album does not exist**: A text message.

Three numbered callouts are present:

- 3**: Points to the "Back to Albums List" button.
- 9**: Points to the "Cancel" button.
- 1**: Points to the "Logbut" button.
